is rich in coal, iron, timber, potter's clay, etc., and the most inviting field in Kentucky for investment of capital and pluck.

### PLANNING FOR BETTER ROADS

Method of Construction Must Be Put in Operation Which Will Produce More Durable Highways.

"Waterbound macadam roads, which for practically a century have been made quite for the traffic, have now, under the new conditions, become obsolete, and their further construction means a serious waste of public funds," is the opinion of former President Lewis R. Squire of the American Automobile Association.

"Macadam may answer for older roads and cross roads where there is little travel to wear the surface into dust, and few fast moving vehicles to blow the dust into the air, but it cannot be put in operation which will produce durable roads."

"Wherever it can be used concrete makes a most excellent road, or a road base for some other kind of surface. The state of California has adopted concrete construction for practically its entire system of state highways, after a mass thorough investigation. Wayne county, Michigan, has been building concrete roads for the past five years, and they have given most excellent satisfaction."

"Before the Wayne county authorities had learned by experience how to build concrete roads with expansion joints to prevent the concrete from cracking in cold weather and buckling in hot sun, several miles of roads were built which broke into frequent cracks. To repair these cracked sections of road they poured hot bituminous material into the cracks and covered them with sand. This has raised the level of the concrete, and the whole turns a most delightful smooth road to travel over, and one which looks as if it were for a generation, at least."

In some sections of the country concrete is being used as a base, and two or three inches of broken stone mixed with bituminous material, put

## POULTRY FACTS.

### COLONY HOUSES FOR WINTER

Some Poultrymen Arrange Summer Coops in Suitable Manner for Use During the Cold Weather.

When young birds are brought in from the raising we often find ourselves in need of more house room to winter the increased flock.

There are several ways in which the summer colony coops may be made to serve out the winter house. If there is but one it may be placed close to the main house and used as an extra scratching and exercise room. The fowls may then pass from the main room to the addition by means of a tube constructed of boards and yet leave the addition to the scratching of the fowls. The cost is a small item, for one board will supply six hens for a week or ten days.

At our expense to suspend the head so that the fowls will be forced to jump a hole to get a line. It is left hanging for two hours each day, and as it is taken down - for two reasons: first, to prevent the fowls from eating too much and becoming loose in the hens, and, second, for the sake of economy.

Possibly sprouted grain will be found much cheaper than cabbage. We always try to have sprouted oats on hand to feed, but at times we are content without a thing in that line. It is then that the cabbage comes to the rescue. The best place to sprout the oats in winter is in a warm cellar or parlor. Do not attempt to sprout in the house, for the chances are that it will never sprout. It takes a temperature of about 50 degrees to sprout the grain to the best advantage.

Some take their summer colony coops of knockdown sections so arranged that some live or six of them may be set up together in one continuous shed for sheltering the birds in winter. Such a pen must either be banked with straw or covered with manure for the winter to make it wind-proof. By the time the young birds are ready for the colony houses another year the old ones are having free run of the farm.

### DRINKING PAN AND GRIT BOX

Box is Elevated to Prevent Litter Being Scratched Into It—Convenience Is Easily Made.

The accompanying illustration of a combination drinking pan and grit box appeared in a recent issue of *Successful Farming*. The idea of elevating the drinking pan is to keep the water clean and prevent litter being scratched into it. The birds soon learn to fly upon the perch in front of the pan, to get the clear water.

The pan itself is made about three inches deep, so that when the water becomes frozen it can be easily dumped out.

The small hopper or box under the grit, or be divided into compartments drinking pan is made on the self-scrubbing principle, and may be used for grit, or be divided into compartments

for oyster shell and grit, or beef scrap. The frame on which the pan rests, is made to fit over the side of the hopper, the cross slats being thin on the top of the hopper. The whole contrivance can be easily made out of odds and ends of lumber found lying around most poultry or barn yards. The combination, when finished, hangs on the wall at a convenient height.

### PROFITABLE TO GRADE EGGS

Better Prices Are Always Secured When Eggs Are Sorted According to Size and Color.

Even buyers at the country store will appreciate your efforts if you will sort your eggs according to size and color. Graded eggs show up a great deal better than those that are piled promiscuously, and should — and will — command a better price if the dealer's attention is called to the fact, and he is assured that your eggs will be furnished that way all the time.

There are few, even, of country stores, that would not be able to command a higher price for uniform, clean, fresh eggs, attractively packed, and one that produces the kind of the year round can secure an advance in the market price. Large shippers will jump at the chance to secure eggs of this class, and are always ready to pay a higher price.

One firm made the statement recently that strictly first-class eggs were worth eight cents a dozen more in their trade than eggs that they could not guarantee. It is the cheapest possible way to increase the poultry income. Try it.

**Best Grain Raised.**

Certain enterprising fertilizer men in the west are selling fine ground rock and sand as fertilizer. Some of this stuff they call grass meal and stone dust.

A mixture of clay and lime makes one of the very best topsoil mixtures for trees. They lay on the lime because it contains the stuff of which trees are made.

### GREEN FOOD IN THE WINTER

Turnips, Cabbages, Beets and all such Vegetables Thrive Clean, Which All Fowls Appreciate.

During spring, summer and fall it is not difficult to supply a variety of green food for fowls, as any kind of tender growing vegetation is relished by them, but when cold weather sets in it is very different, and things must be set aside during the fall season.

Turnips, cabbage, beets and all such vegetables make good food and furnish a plentiful change, which the fowls appreciate. Of all the vegetables we have had the best results with cabbage. It is usually cheap in the fall and well into the winter. We have paid as much as 5 cents per head for it because we realize that it is to our advantage to supply the green food to the fowls. The cost is a small item, for one head will supply six hens for a week or ten days.

#### Traction Line Wants Entrance Here.

Judge Clarence Dallam and Dr. W. H. Engelhardt, of Louisville, were here Monday, and appeared before the city council that night, presented their plans for the building of an electric car line from here, through Central City to the "Bluff," on Green river, near South Carrollton, and, taking for a free right-of-way through town, along any street or alley which might be designated and agreed upon. They represent Eastern capitalists and are asking no bonus for the road, but want free right of way along the line. They will be here to go over the matter with our people, and will receive every encouragement in the matter, as this would be a great factor in the development of our rapidly growing county, as well as great convenience to the many thousands of people directly benefited. At the river terminus it is planned to erect a large electric plant, of sufficient size to supply light and power to all the mines in the county, and this central plant would cut down over individual plants. With the road planned now only from here to the "Bluff," a branch to Drakesboro from Central City is being considered, and it is hoped that before many years this branch will become part of a system of electric lines reaching many points in Western Kentucky and Tennessee, where other lines are under construction and being planned.

Everyone who expects to accomplish anything is on the jump, as this is a short month.

Try Heinz bulk mince meat; nothing better for pies. G. M. Howard & Co.

Why be constipated when you can buy LIV-VER-LAX from G. E. Countzler.

Mr. Harry Weir left yesterday for Helena, Ark., to attend the funeral of his brother in law, W. D. Reeves.

Get good wallpaper at trifling prices at Countzler's; stock must be closed to make room for new goods, and prices are made attractive to the buyer.

G. E. Countzler is headquarters for LIV-VER-LAX.

Big lot remnants in wallpaper at Roark's at \$2.00 per roll, nearly all at one quarter price.

Miss Clytie Thornton, of Bradfordsville, is a guest of Mrs. C. M. Howard.

If the fine rain of Tuesday was a fair sample of the six weeks' bad weather we are to have, Mr. Bradford, hog, let it come, it is all we can weather fits as well as that did, we shall be blessed with it.

Mr. and Mrs. C. W. Roark and Mrs. Hubert Meredith were in Owensboro the first of the week, attendants of the Stuart-Brown wedding.

An entertainment that will draw a large audience and prove enjoyable to everyone will be the Evening of Old Time Songs, at the opera house St. Valentine night.

Groundhog day is the first in our short month that could attract much attention, but it received more than some of the others will, likely.

There are still a few cases of measles scattered over the county, and the health authorities are keeping close watch to prevent an epidemic.

The King drag users are increasing all the while, and the supply of drags has again been taken by farmers who have pledged to use them free of expense to the public.

Lincoln, St. Valentine, Washington are collected for recognition this month. And it is a short month too.

Greenville has a winner basket ball team, and is attracting attention all over the state.

Things are somewhat more quiet now, since circuit court closed last Friday.

Several persons from here are planning to attend the Automobile Show in Louisville next week.

The rain of last Friday night brought a rise of a foot in the lake, and brought relief from a most serious situation, as it is highly probable that ground hog weather will supply rain along with other things, and so hold us from want.

There has been more fall and winter plowing done here this year than ever before known, and it is a sure thing that the farmer who does this will profit largely by it. Men who really farm are learning that they can always be at work to advantage, and plowing in fall and winter is the one thing which gets first attention.

#### Hugh Cornell Dies of Pneumonia.

At an illness of ten days from pneumonia, Mr. Hugh Cornell, in his 25th year, died at his home south of town at 5 o'clock last Sunday afternoon. He was a bright, progressive young man, well known and universally liked, and his death was a shock to a wide circle. Funeral services were conducted by Rev. G. B. McDonald and it is noted was to the graveyard at Pleasant Hill church at 3 o'clock Monday afternoon, a very crowd in attendance. He is survived by his wife and one child.

**Common School Diploma Examination.**

On the last Friday and Saturday in this month the examination for Common School Diploma will be held in the Court House. Every boy and girl in the county should take advantage of this examination for it adapts them to the County High School for three months if successfully passed.

Amy M. Longstaff, Sept.

#### When to Work Roads.

In the spring is the proper time to work roads, according to experts of the U. S. Department of Agriculture. To put off the work until August or September is a great mistake, they declare in a statement issued recently.

"The roads," says the department, "should be worked when the soil is damp, so as to make the soil loamy when it dries out." If the roads are worked when they are dry it takes more power to draw the machine and besides dry earth and dust retain moisture and quickly return rains."

"In the working of the roads is determined the later part of the summer, when the surface is broken dry and hard, they are not only difficult to work, but the work is inconsistent when done.

Repairs to roads should be made when needed and not once a year after crops are harvested."

From the above it appears that we have been losing much of the \$200,000 per year we have been expending on our roads, as we have been piling from a few inches to a few feet of dust in the roads, which will never pack, and then when the first rain comes the soil soaks up the moisture like a sponge, and from touches of dust we travel through feet of mud into which vehicle wheels drop. Another idea exploded in the recommendation that repairs to roads should be made when needed, no matter what the season, instead of the claim to do all the road working in a few weeks of the year. Good earth roads may be made, but not along the plan that has been employed in this section.

**Boy Shoots Another.**

Orion McPherson shot at Orie Hendricks Monday evening, using a shotgun, and slightly wounded Hendricks. It is said the trouble came up over a dog belonging to Hendricks, and which he was attempting to take home. Both boys are about 10 years old. An examining trial will be held today or tomorrow.

**Wanted.—Experienced Salesman,**

every county, to call on Merchts only. The chance of your life. Address W. C. Powell, 241 Chamber Commerce, Columbus, Ohio.

**Evelyn, daughter of Mrs. Minnie Martin, was attacked by a dog on Main street last Sunday night;**

her clothing was torn, but she was only slightly injured, though badly frightened.

**Notice to Poolers.**

Notice to All Poolers Who Have Tobacco Yet to Deliver:

I deem a statement from me at this time to be necessary.

About half of our pool has been delivered and so far as the prices are concerned we have been able to give so far almost perfect satisfaction, but owing to the cloudy damp weather the tobacco has been brought in too high.

This tobacco was sold to be delivered in good order. I am bound

to give the buyers time to hang

this tobacco up. I hope that

poolers having tobacco yet to

deliver will see that it is delivered in good order, so that when

the house opens again we won't

have to stop until the entire pool

has been delivered. Had it not

been for the tobacco being so

high the crop could have been

received and full payment made

by the fifteenth of February. I

hope all members and part es

who expect to pool this year will

meet in the locals as early as

possible, and pay up their dues

that we may have a prosperous

year in '91.

It appears that we have fallen up

on the time when from the high

cost of living, and the cost of high

living; the hospital bills and post

mortem obsequies, the average man

can hardly afford to live or die.

The only apparent release from this

dilemma is suspended animation

and sub conscious existence.

But, seriously, the foolish and unnecessary expense of the modern funeral is becoming more and more an embarrassing question. We

have known of not a few instances

in which the amount spent for funer al expenses represented sacrifice

and suffering for the living. In

many cases those who must meet

the funeral expenses out of their

meager income fully realize that

they must conform to the established

custom in this connection. The

money that is spent for the expe

nse of the casket and floral designs would

go a long way in feeding the widow

and her fatherless children. Flowe

rs will not clothe the naked, nor

feed the hungry.

Certainly, there can be no good

reason, regardless of the estate of

the dead or the wealth of the living,

for a lavish expenditure upon our

dead. Such ostentation is contrary

to the simplicity of the Christian life,

to say nothing of establishing

a precedent that those who are

unable to, will feel constrained to

follow. In this regard the minister may render a real service. —Western Recorder.

Mrs. E. G. Mann.

Calomel, Calomel, you cannot

stay for LIV-VER-LAX has shown

us an easier way. Ask G. E.

Countzler.

We have gotten considerable rain

the past few days.

#### W. D. Reeves Killed in Auto Accident.

Mr. W. D. Reeves was instantly killed in an auto accident at Helena, Ark., Tuesday afternoon. He was driving his car, and had one of his sons, Frank, with him, when in some manner the car was overturned, crushing him, but the boy was not hurt. The accident occurred in front of his home. Mr. Reeves was well known here, having married Miss Louise Weir, of this city, and having made occasional visits here since. He was a prominent businessman, being largely interested in timber lands, and operating numerous saw and planing mill plants. Burial will be at Helena this afternoon. His wife and five children survive him.

**Loyal Order of Moose Meet Saturday Night.**

Members of the Loyal Order of Moose will hold a meeting on the third floor of the First National Bank building next Saturday night, preparatory to organizing a Lodge here. There are many persons here who are members, holding membership at Central City, but they will all transfer here, where many new members will be secured, and a public meeting will be held at the court house preceding the installation.

**Stuart-Brown Wedding in Owensboro.**

Miss Ethel Stuart, of Owensboro, and Mr. Floyd R. Brown, of Chicago, were married at the home of the bride's parents, Dr. and Mrs. J. M. Stuart, at 11 o'clock Monday morning, the ceremony being performed by Dr. Lewis Powell, pastor of the Settle Memorial Methodist church, in the presence of relatives and intimate friends of the contracting parties.

After a short tour the couple will be at home in Chicago, where Mr. Brown holds an important position in the electrical department of the Automatic Telephone Co.
